

Muslim Jama'ah App – App Structure

Core Idea

The main goal of the app is to **connect Muslims who want to pray together**.

A person can create a prayer gathering, invite nearby Muslims, and form a Jama'ah. Other users can see nearby prayer gatherings and request to join.

Core concept:

Find Muslims. Form a Jama'ah. Pray Together.

1. Home Screen

The Home Screen will be the main screen of the app.

It will show:

- ✦ Today's prayer times
- ✦ Nearby Jama'ahs
- ✦ Ongoing prayer gatherings
- ✦ Upcoming Jama'ahs
- ✦ Distance from the user
- ✦ Number of people joining

Example:

Asr Jama'ah

📍 0.4 miles away

👥 3 people joined

🕒 Starts in 15 minutes

[Join Jama'ah]

2. Create a Jama'ah

This will be one of the main features of the app.

A user can create a new Jama'ah.

The user selects:

Prayer:

- ✦ Fajr
- ✦ Dhuhr
- ✦ Asr
- ✦ Maghrib
- ✦ Isha
- ✦ Jumu'ah

Location:

- ✦ Current location
- ✦ Select a location
- ✦ Public place
- ✦ Workplace
- ✦ University
- ✦ Park
- ✦ Other

Time:

- ✦ Now
- ✦ In 15 minutes
- ✦ In 30 minutes
- ✦ Custom time

Then the user clicks:

[Create Jama'ah]

3. Join / Request System

Users can request to join an existing Jama'ah.

For example:

Dhuhr Jama'ah

📍 0.3 miles away

👥 Ahmed + 2 others

🕒 1:20 PM

The user clicks:

[Request to Join]

The organizer receives:

Abdullah wants to join your Jama'ah.

[Accept] [Decline]

After accepting:

☒ Abdullah joined your Jama'ah.

4. Find People to Pray

This can be one of the most important features.

If someone is alone and wants to pray in Jama'ah, they can select:

Find People to Pray

Then they choose:

Prayer: Asr

Location: Within 1 mile

Time: Now

Nearby users will receive a notification:

Someone near you wants to pray Asr.
They are 0.6 miles away.

[Join] [Not Now]

This can help people quickly form a Jama'ah.

5. Smart Prayer Notifications

Users can choose what notifications they want.

For example:

- ♦ Someone needs a Jama'ah nearby
- ♦ A Jama'ah is within 1 mile
- ♦ A Jama'ah has 2+ people
- ♦ Jumu'ah is available nearby

Example notification:

Jama'ah Nearby

4 Muslims are gathering for Maghrib 0.5 miles from you.

[View & Join]

6. Prayer Map

The app will have a map showing nearby prayer options.

The map can show:

Mosque
Active Jama'ah
Upcoming Jama'ah
Prayer Gathering

For example:

0.4 mi — Asr — 4 people
0.7 mi — Asr — 2 people
1.2 mi — Asr — 7 people

Users can choose the most convenient one and join.

7. Mosque & Community Section

The app can also include nearby mosques and Muslim communities.

Mosque Profile

Each mosque can have:

- ♦ Mosque name
- ♦ Address
- ♦ Prayer times
- ♦ Jumu'ah times
- ♦ Women's prayer space
- ♦ Parking information
- ♦ Community events
- ♦ Announcements

This will make the app more than just a prayer app. It can become a **Muslim community platform**.

8. User Profile

Each user will have a basic profile.

Profile can include:

- ✦ Name
- ✦ Profile picture
- ✦ City
- ✦ Prayer preferences
- ✦ Jama'ah history
- ✦ Community contribution

For privacy, the user's exact home address should never be shown publicly.

9. Trust & Verification

Since users may meet people they do not know, trust and safety are very important.

Verification:

- ✦ Phone verification
- ✦ Email verification
- ✦ Optional ID verification
- ✦ Community verification

Trust Information:

For example:

☆ 4.9
38 Jama'ahs joined
12 Jama'ahs hosted

The rating should focus on **reliability and community behavior**, not on personal religious behavior.

10. Safety Features

The app should have strong safety features.

Features:

- ✦ Share meeting details with a trusted contact

- Report user
- Block user
- Emergency help
- Public meeting preference
- Approximate location sharing

Users can select:

- ☒ I prefer public places
- ☒ I don't want to share my home location
- ☒ Show approximate location only

Privacy controls should be especially strong for women and other users who prefer additional safety.

11. Share Jama'ah

Users should be able to easily share their Jama'ah with others.

After creating a Jama'ah:

[Share Jama'ah]

Users can share it through:

- WhatsApp
- Facebook
- Messenger
- Instagram
- SMS
- Copy Link

Example:

Asr Jama'ah Near You

0.5 miles away

4:30 PM

3 people already joining

Join us: [Link]

12. Direct Jama'ah Link

Every Jama'ah can have a unique link.

For example:

app.com/jamaah/ABC123

If someone receives the link through WhatsApp or another platform, it will directly open that Jama'ah in the app.

This can help the app grow through sharing.

13. Community Contribution

The app can encourage users to contribute to the community.

Possible badges:

-  Jama'ah Starter
-  Community Helper
-  Ramadan Contributor
-  Regular Member
-  Community Builder

Instead of creating a competitive leaderboard for prayer, the app should focus on **positive community contribution**.

14. Jumu'ah Feature

There can be a separate section for Jumu'ah.

Jumu'ah Near You

Users can find:

- ♦ Nearby mosques
- ♦ Jumu'ah time
- ♦ Distance
- ♦ Parking
- ♦ Women's facilities
- ♦ Community information

Users can also create or join Jumu'ah-related gatherings.

15. Ramadan Mode

A special Ramadan section can be added later.

Ramadan Features:

- ✦ Taraweeh nearby
- ✦ Iftar gatherings
- ✦ Suhoor gatherings
- ✦ Ramadan Jama'ah
- ✦ Mosque events
- ✦ Iftar invitations

Example:

Iftar Gathering

8 Muslims are joining

0.7 miles away

[Join]

16. Search & Filters

Users can search and filter prayer gatherings.

Prayer:

- ✦ Fajr
- ✦ Dhuhr
- ✦ Asr
- ✦ Maghrib
- ✦ Isha
- ✦ Jumu'ah

Distance:

- ✦ 0.5 mile
- ✦ 1 mile
- ✦ 2 miles
- ✦ 5 miles

Time:

- ✦ Now
- ✦ Next 30 minutes
- ✦ Later

Type:

- ✦ Mosque
 - ✦ Jama'ah
 - ✦ Community Event
-

17. Admin Dashboard

The admin team will have a separate web dashboard.

Admin can monitor:

- ✦ Total users
- ✦ Active users
- ✦ Jama'ahs created
- ✦ Jama'ahs completed
- ✦ Average participants
- ✦ Active cities
- ✦ Mosque registrations
- ✦ User reports
- ✦ Blocked users
- ✦ Suspicious activity

Geographic Analytics

The admin can see user activity by city.

For example:

New York → 2,300 users

Chicago → 1,100 users

Houston → 900 users

Dallas → 700 users

This will help the company decide where to expand.

Main User Flow

For someone looking for a Jama'ah:

Download App

Sign Up

↓
Allow Location
↓
Set Prayer Preferences
↓
Home
↓
See Nearby Jama'ahs
↓
Choose a Jama'ah
↓
Request to Join
↓
Organizer Accepts
↓
Pray Together

For someone creating a Jama'ah:

Home
↓
Create Jama'ah
↓
Select Prayer
↓
Select Time
↓
Select Location
↓
Create Jama'ah
↓
Share Jama'ah
↓
People Join
↓
Jama'ah Happens
↓
Mark as Completed

Main Navigation

The app can have five main tabs:

Home

Nearby Jama'ahs and prayer information.

Explore

Map, mosques, and nearby Jama'ahs.

Create

Create a new Jama'ah.

Activity

Requests, invitations, and notifications.

Profile

Account, preferences, and Jama'ah history.

Core App Loop

The main user journey can be:

Need Prayer → Find People → Create Jama'ah → Invite Nearby Muslims → Join → Pray Together → Share → More People Join

For example, a Muslim in New York finishes work and wants to pray Asr.

The app shows:

 **3 Muslims want to pray Asr near you.**

The user joins.

3 → 4 people

They choose a suitable public location and pray together.

One person shares the Jama'ah link with a WhatsApp group.

Three more people join.

4 → 7 people

This creates the app's **community and network effect**.

MVP Version

The first version does not need every feature.

The MVP should focus on:

1. Sign Up / Login
2. Location
3. Prayer Times
4. Nearby Jama'ahs
5. Create Jama'ah
6. Join / Request
7. Share Jama'ah
8. Push Notifications
9. Map
10. User Profile
11. Block / Report
12. Basic Admin Panel

After getting users and feedback, the app can add:

Mosques → Jumu'ah → Ramadan → Community Events → Verification → Advanced Matching

App Positioning

The app should not be positioned only as a **“Prayer App.”**

A better positioning would be:

A Muslim Community App for Finding and Building Jama'ah.

The app connects four important things:

Muslims + Location + Prayer + Community

The ultimate goal is to make it easier for Muslims in the USA to **find each other, build a Jama'ah, and pray together.**
